

# Lean Six Sigma Project Champion

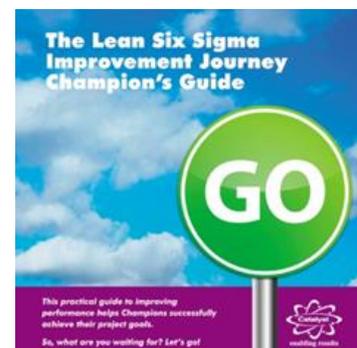

In an organisation where Lean Six Sigma has been deployed (or is being deployed), this course provides managers with the skills and knowledge to play their role alongside the Belts. As process owners, they recognise when a Lean Six Sigma project is needed - at which point they secure the services of a Green or Black Belt. They then support the Belt to ensure the project is successfully completed in a timely manner and improvements are sustainably embedded in the Operation.

Lean Six Sigma techniques like Visual Management are likely to be implemented (or updated) by the project team and the process will continue to benefit from these after the project is finished

The Champion needs to:

- Select or approve the project ensuring the business case is strong
- Select the project team
- Provide strategic direction for the project team
- Develop and agree the Project Charter and scope
- Take an active role in the review steps
- Help the team overcome roadblocks
- Facilitate the identification of resources for the team as needed

## Learning Outcomes

This course teaches you how to select and sponsor improvement projects, providing support and strategic guidance to the Green and Black Belts. You will learn the fundamentals of the Lean Six Sigma DMAIC approach and the questions to ask at each stage review. While the explicit focus is on the enabling and governing role of the Champion, the broad level of the additional content is that of Yellow Belt.

### Outcomes for Your Business:

Lean Six Sigma projects improve core business processes. They are too important to be “left to their own devices”. Projects which are actively sponsored are more successful, have higher completion rates, and deliver faster.

### Outcomes for Your Personal Development:

Even though this is a short course, you will still learn new ways to think about and manage process performance. You'll be equipped to interact knowledgeably with the Lean Six Sigma practitioners in your business. You can become recognised as a British Quality Foundation Lean Six Sigma Project Champion

### How can I take this course?

We deliver this course as a one day open programme or a one-two day inhouse programme.

### Support Pack

All delegates receive

- 12 months access to Catalyst's online **Business Improvement Zone** – over 75 short videos recorded live in the classroom covering the entire Yellow Belt course content to help enhance your LSS knowledge
- Printed and pdf copies of the course slides
- The Lean Six Sigma Improvement Journey Champions Guide
- The Lean Six Sigma Improvement Journey Pocket Guide
- The Managing Change Pocket Guide
- Project Storyboard Requirements Checklist
- Optionally, British Quality Foundation Lean Six Sigma exam

### Follow-on Options

- British Quality Project Champion Certification
- Project Coaching Support Service
- Lean Six Sigma Project Team Member e-learning training pack

*Catalyst offers British Quality Foundation accredited Lean Six Sigma training from Awareness through to Master Black Belt level including workshops for Executive Teams and Project Champions.*
