

Value Stream Mapping Short Course

This is a comprehensive course covering VSM from the construction of the Current State Map through to the achievement of the Future State. A broad suite of associated Lean techniques are taught along with the practicalities of facilitating VSM workshops in your organisation.

Objectives

To understand...

- What Value Stream Mapping is
- Why it is important
- How to apply it along with other key aspects of lean thinking to identify and eliminate waste across the end-to-end process in order to improve flow and reduce cycle times

Workshop Agenda

1. Introductions
2. Lean Principles
3. What is Value Stream Mapping?
4. Getting Prepared
5. Creating the Current State VSM
6. Identify Improvement Opportunities
7. Future State VSM
8. Achieving the Future State
9. Whole Value Stream Mapping
10. Summary
